**VIKING GLORY | VIKING LINE | CASAMANIA BY HORM**

Launching from Turku, Finland to arrive at the Åland Islands in Stockholm, the Viking Glory makes a thrilling voyage of discovery to the Nordic countries. The luxurious cruise ship built by Finnish shipping company Viking Line, which specializes in transporting passengers in the Northern Baltic Sea, is the world's first ship to be powered by liquefied natural gas (LNG) and to use a green, energy-saving maneuvering system. The interior design by Swedish architectural firm Koncept Stockholm and the choice of furniture companies were also based on sustainability and respect for the environment. The lounge area mid-ship was furnished with pieces from Horm's Casamania line like Raphia Rattan chairs by LucidiPevere. Lightweight and eco-sustainable, with olive-green painted metal frames and elegant antique-pink cushions, they integrate well with the ship's luxurious interior.
