Decòrative Collection

Linea Light Group presents the novelties 2023 of the Decòrative collection

WORDS – SUHA SABITH

Yo-Yo

Camping

Perla

The Decòrative collection from Linea Light features cutting-edge lighting systems, which offer maximum flexibility for ever smarter spaces.

Camping

Camping is a table lamp that is portable and rechargeable, and inspired by old transportable oil lamps with a handle. *Camping* is characterised by a modernised silhouette, with a specific focus on technology, portability and quality. The lamp plate and handle can be positioned at different heights, influencing the surrounding light emission.

Dubcolor

Dubcolor is an elegant and colourful table lamp, available in six different colours, perfect for adapting to a variety of styles. The lamp is rechargeable via a Type C USB cable and charger, both included in the package.

Alba

Alba is a wall lamp suitable for indoor and outdoor use. It is extremely versatile, thanks to a double installation surface that enables the user to orient the lamp to suit their needs, choosing to have more light directed downwards or upwards. Moreover, by rotating it 180° the user will have two further types of positioning and light previous ones. The body and the frame come in painted white aluminium or wrinkled black (indoor), dark brown or wrinkled grey (outdoor IP65) and clear glass diffuser.

Yo-Yo

Available in both pendant and wall-mounted versions, *Yo-Yo* is a lamp distinguished by its asymmetrical shape, reminiscent of the unforgettable and timeless

yo-yo. It is composed of two equal, slightly oblique parts that enclose a radial-emitting LED source. The wall-mounted *Yo-Yo* offers optimal glare control and a more pronounced emission of light, depending on the chosen direction.

Miguel

When you add a touch of colour to the industrial style, the result is *Miguel*: a metal pendant that combines rigorous and essential lines with a selection of colours designed for contemporary environments. The shade is white on the inside and reflects the light by directing it to the surface below. Externally, the *Miguel* family allows the user to indulge in a choice of favourite colours: black, grey, red, blue and green.

Perla

Perla is an unmistakable name for something refined, unique and with precious finishes like the pendant of Linea Light Group. It is available in two versions: the first has a total of nine arms (one section of six and one of three) that can be combined in two different configurations; the second has a total of 12 arms (one section of six and two of three) that can be combined in three different configurations.

Poe

Poe is a family of wall, floor and pendant solutions. It comprises a vertical stem lamp, very slim and minimalist, with indirect lighting. The light is delivered only where it is needed, punctual and precise. Essentially it is perfect in any living space or for illuminating tables. The frame is in white or black embossed painted metal or copper; the diffuser in polymethylmethacrylate.
